SANJAY JANA

Senior Full Stack Engineer • MERN Stack • Next.js • AI-Powered Applications
Mumbai, India | sjana7797@gmail.com | +91-7977024576 | sanjayjana.dev | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 6+ years of experience architecting and delivering scalable SaaS platforms and AI-driven applications. Deep expertise in the MERN stack, Next.js, TypeScript, and Node.js with a strong focus on API design, backend architecture, and performance optimization. Proven track record of building multi-model AI platforms, implementing RAG pipelines, and integrating LLM workflows. Adept at collaborating with cross-functional teams to ship production-ready features aligned with business objectives. Experienced in role-based access control (RBAC), authentication systems, real-time data visualization, and modern DevOps practices.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | **Enso WebWorks** | Mumbai *Sep 2025 – Present*

- ➔ Architected and delivered a centralized internal admin portal for all Enso products with granular role-based access control (RBAC), empowering sales, support, and operations teams to manage leads, users, and customer issues with improved efficiency.
- ➔ Built a production-grade AI-powered chat application featuring real-time web search integration (Brave Search API) and intent-based query routing to dynamically render domain-specific responses including stock market data, financial metrics, and interactive utility cards.
- ➔ Implemented intent classification using Hugging Face Transformer models, achieving accurate detection of user query types (stocks, search, tools) and significantly improving response relevance and overall UX quality.
- ➔ Designed and launched a scalable multi-model AI chat platform enabling users to interact with multiple LLMs via LangChain, with support for RAG (Retrieval-Augmented Generation) pipelines, Ollama integration, and configurable agent workflows.
- ➔ Architected the AI platform as a shared internal service, enabling other Enso product teams to integrate custom AI agents with minimal configuration and onboarding overhead.

Senior Software Engineer | **MintOak** | Mumbai *Oct 2024 – Sep 2025*

- ➔ Developed and maintained a high-performance fintech platform using Next.js, TypeScript, and React.js, delivering a seamless, scalable user experience for financial data consumers.
- ➔ Engineered reusable UI component libraries using design system patterns, improving codebase maintainability, developer velocity, and rendering performance across the platform.
- ➔ Optimized frontend performance by implementing Server-Side Rendering (SSR) and Static Site Generation (SSG), reducing average page load times by 50% and boosting SEO rankings.
- ➔ Integrated third-party APIs and built real-time data visualization dashboards to surface actionable financial insights, enhancing user engagement and retention.
- ➔ Collaborated closely with designers, backend engineers, and product stakeholders to ensure a responsive, pixel-perfect UI aligned with business goals.

Software Engineer – Full Stack | **SaaSMonk** | Mumbai *Sep 2022 – Oct 2024*

- ➔ Led development of a B2B SaaS product focused on enhancing client marketing strategies and accelerating revenue growth through data-driven tooling.
- ➔ Leveraged Next.js API routes to build robust backend services, ensuring reliable data flow, efficient API performance, and seamless frontend-backend integration.
- ➔ Collaborated with product managers and business stakeholders to translate requirements into scalable, production-ready features.

React Developer | ValarTech | Mumbai *Jan 2022 – Aug 2022*

- ➔ Developed performant React.js applications for multiple clients, focusing on immersive user experiences and seamless API integrations built with Next.js.
- ➔ Crafted visually appealing, fully responsive interfaces using Tailwind CSS, ensuring cross-device compatibility and consistent design standards.

- ➔ Collaborated with cross-functional teams to gather requirements, define scope, and implement client-requested features on schedule.

System Engineer | **TCS** | Mumbai *Oct 2019 – Nov 2021*

- ➔ Built and maintained a web application for displaying and managing RTGS and NEFT transactions from SFMS (Structured Financial Messaging System) integrated into a banking platform.
- ➔ Developed React components with a strong understanding of UI/UX principles and financial domain business logic, delivering accurate and intuitive transaction management workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript, Core Java
Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Turbo Repo
Backend: Node.js, Express.js, Nest.js, Hono, Bun, Java Spring Boot
AI / ML: LangChain, RAG Pipelines, Ollama, Hugging Face Transformers, LLM Integration, Brave Search API
Databases: MongoDB, PostgreSQL, Redis
API Design: REST, tRPC,GraphQL
Testing: Jest, Vitest, React Testing Library
DevOps & Tools: Docker, Git, GitHub, VS Code, Jira, Linear

EDUCATION

Executive PG Programme in Software Development *GPA: 3.8 / 4.0*
IIIT Bangalore | Jun 2022 – Aug 2023

Bachelor of Engineering – Electronics and Telecommunications
Rajiv Gandhi Institute of Technology, Mumbai | Jun 2015 – May 2019

NOTABLE PROJECTS

AHMU – Online Pharmacy Platform
Developed a compliant online pharmacy application following NHS rules and safeguarding practices, enabling safe and timely delivery of medicines to patients.

One Store – Full Stack E-Commerce Platform
Built a scalable e-commerce platform using Next.js, Nest.js, Tailwind CSS, MongoDB, and Turbo Repo, delivering seamless shopping experiences through a monorepo architecture with robust backend functionality.
